

# Empowering Remote Operations with Irys

In today's interconnected world, accessing critical operational data securely from anywhere is no longer a luxury—it's a necessity.

Traditional systems often fall short, requiring complex VPN setups and limiting access to those within the company network. This gap leaves remote personnel struggling to access vital information when they need it most.

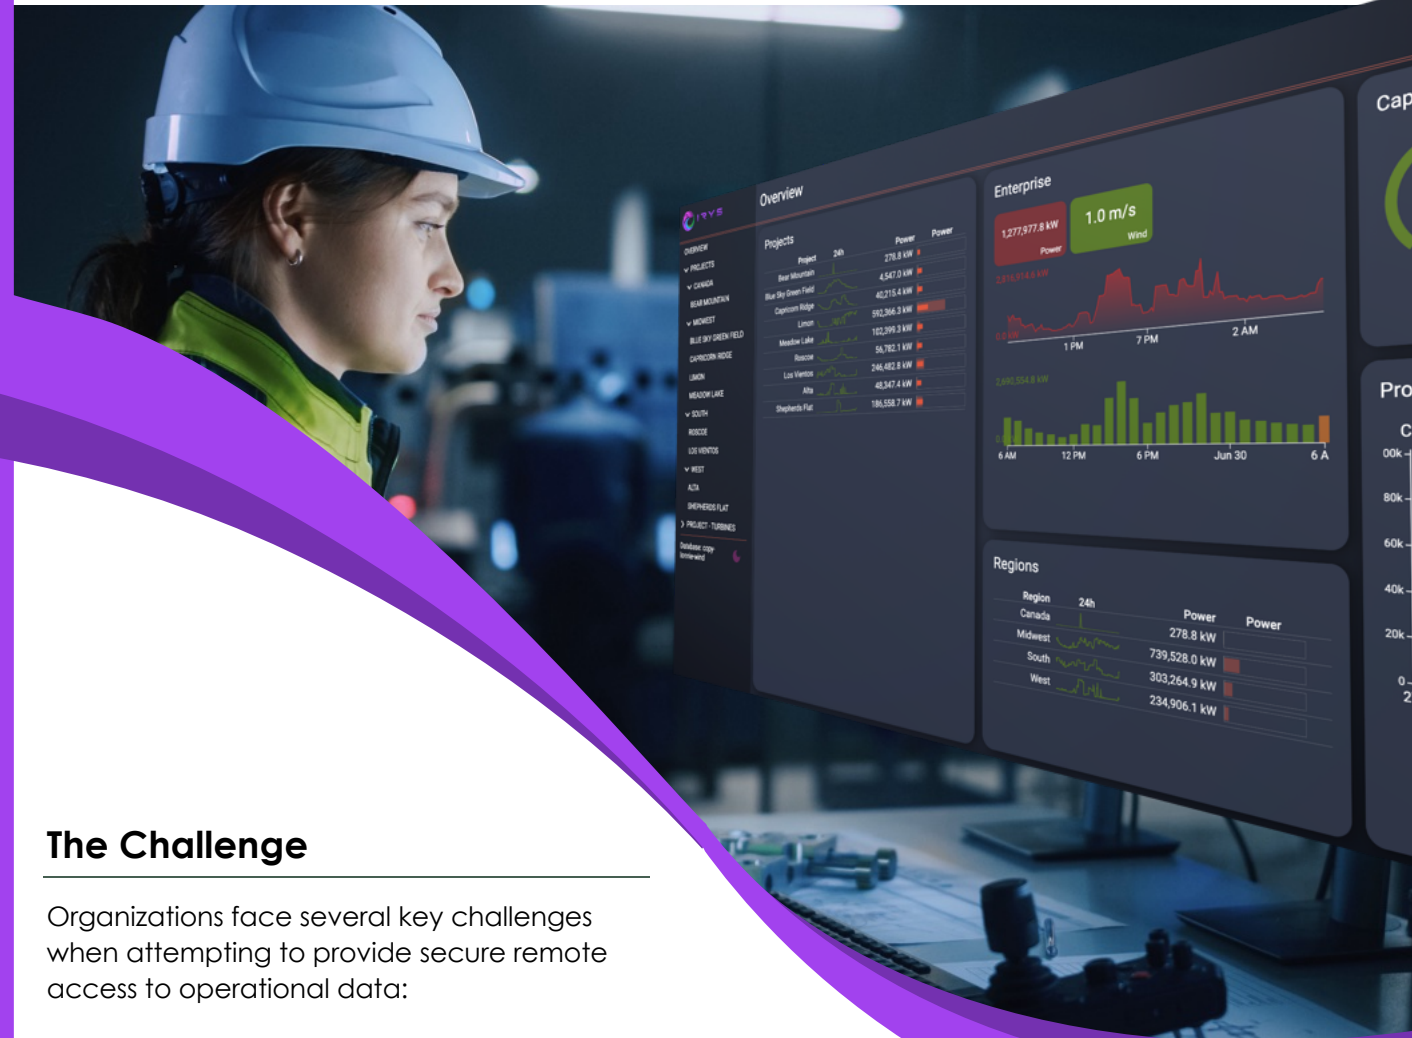

## The Challenge

Organizations face several key challenges when attempting to provide secure remote access to operational data:

1. **Security Concerns:** Balancing widespread access with robust data security is complex and often results in restricted access or information silos.
2. **Mobile Limitations:** Many existing solutions are not optimized for mobile devices, hindering on-site data access and decision-making.
3. **Integration Complexity:** Traditional BI tools are not designed for live data and require complex data pipelines and specialized knowledge to setup.

## Secure Remote Intelligence

Irys is designed to address these challenges, providing a comprehensive solution for secure, remote access to live operational data. It empowers your organization to make confident, data-driven decisions from anywhere, at any time.

## Key Features & Benefits

**Secure Web-based Access** – Access operational information securely through a web browser, no VPN required.

**Azure Entra ID Integration** – Leverage your existing security infrastructure for seamless, controlled access.

**Mobile Optimization** – All dashboards are fully functional on mobile devices.

**Low Bandwidth Efficiency** – ideal for remote locations with limited connectivity.

## Impact

Imagine a renewable energy company managing diverse facilities across multiple states. With Irys, their operations transform:

- Field technicians securely access real-time data on mobile devices without VPN.
- Control center operators provide immediate support with shared, live asset views.
- Managers gain comprehensive operational oversight from anywhere.
- IT teams ensure robust security with widespread access, leveraging existing Azure Entra ID.

## Empowering Informed Decision-Making Anywhere

Irys bridges the gap between remote operations and actionable insights. By addressing the core challenges of secure remote access to real-time data, Irys empowers your entire organization to stay connected, informed, and effective—regardless of location.
